Vatara, Natun Bazar, Dhaka, Bangladesh

PROFESSIONAL SUMMARY

Full Stack Engineer with **1.5+** years of experience building production web applications using JavaScript (ES6+), TypeScript, React.js, and Node.js/Express.js, with hands-on backend work across REST APIs, PostgreSQL, and MongoDB. Comfortable working with third-party APIs, HTTP requests, and JSON-based data exchange, and experienced integrating backend services with frontend applications for seamless data flow. Diagnosed and resolved a 10x production performance gap through deep debugging of build configuration, compression, and API routing reflecting strong analytical and independent problem-solving skills. Quick to pick up new platforms and tools through hands-on learning; eager to build CRM-connected solutions and grow into HubSpot development.

PROFESSIONAL EXPERIENCE

Full Stack Engineer

DOICT - Department of ICT, Bangladesh

Dec 2025 – June 2026

Dhaka, Bangladesh (Contractual)

- **Diagnosed a 10x performance gap** between the AWS EC2 production deployment and a Vercel staging build; traced it to the Vite dev server running in production, disabled gzip compression, and a misconfigured API base URL, then fixed all three.
- **Set up multi-stage Docker builds** and separate Docker Compose configurations for local and production environments; containerized services and configured Nginx as a reverse proxy with caching and security rules for static assets.
- **Built CI/CD pipelines** with GitHub Actions to automate build and deployment to AWS.
- **Introduced Redis (ioredis)** caching for high-traffic geospatial data endpoints.
- **Implemented RBAC** with 4 permission tiers (Super Admin, District, Upazila, Lab Admin) for secure user management.
- **Added** a push notification system

Frontend Developer

ExecuteML

Aug 2025 – Oct 2025

Dover, Delaware, US (Remote)

- **Turned complex multi-agent AI requirements** into modular React components, reducing UI friction reported by the product team.
- **Translated wireframes into responsive, accessible components** with designers and product, using TypeScript and Tailwind CSS.

Frontend Developer

Softvence Agency

Jan 2025 – Jun 2025

Mohakhali, Dhaka (Full-time)

- Delivered **Hayat LifeCare**, a healthcare and lifestyle platform; **Talexia**, a jewelry content automation platform; and **Thari Finance**, a Sharia-compliant fintech platform with real-time stock, crypto, and commodity dashboards.

NOTABLE PROJECTS

Olova UI ([GitHub](#) | [Live Site](#)) *Open-Source React UI Component Library*

Contributed an open-source **React component library** with reusable, accessible, responsive, and highly customizable UI components. The library includes **dark-mode support** and an integration-friendly component architecture, demonstrating practical experience in component-driven development, frontend reusability, and maintainable UI architecture.

ICTD LAB Bangladesh ([GitHub](#) | [Live Site](#))

ICTD LAB Bangladesh, a live government project under DOICT, managing laboratory infrastructure digitally across the country deployed in cloud.

AI Job Assistant ([GitHub](#) | [Live Site](#)) *Career Intelligence Platform*

Developed an end-to-end AI-powered career intelligence platform featuring **ATS resume scoring, intelligent job matching, AI-driven interviews, course recommendations, cover-letter generation, and salary estimation**. The platform was containerized with Docker and deployed on Vercel with CI/CD, providing an automated workflow for multiple career and recruitment-related use cases.

Telegram-AI-and-Odoo-Lead-Automation ([Demo](#))

Self-Hosted Lead Automation

Built an **AI-powered lead qualification system** using Google Gemini AI to auto-capture customer requirements, budget, and timeline through natural conversation, with smart handoff to human agents. Engineered a custom Odoo CRM add-on syncing 13 lead fields in real time via JSON-RPC for zero-touch pipeline updates.

EDUCATION

B.Sc. in Computer Science & Engineering
Bangladesh Army University of Engineering & Technology

Feb 2021 – Feb 2025
CGPA: 3.30 / 4.00

TECHNICAL SKILLS

Programming & Backend: JavaScript (ES6+), TypeScript, Node.js, Express.js, REST APIs, Third-Party API Integration, HTTP/JSON, GraphQL

Databases: PostgreSQL, MongoDB & Mongoose, Redis

Frontend: React.js, Next.js, HTML, CSS, SASS, Tailwind CSS, Bootstrap, Ant Design, Responsive & Cross-Browser UI Development

Tools & Practices: CI/CD (GitHub Actions), Docker, Kubernetes, AWS, Agile/Scrum Collaboration, API Debugging & Web Performance Optimization.

AI Dev Tools: MCP, N8N Automation, Cursor, Claude Code, Codex, LLM APIs (Anthropic, OpenAI), LangChain, RAG Pipelines

ACHIEVEMENTS & ADDITIONAL EXPERIENCE

- Solved 340+ competitive programming problems across [CodeChef](#), [Codeforces](#), and [LeetCode](#), demonstrating problem-solving and debugging foundations.
